World Premiere ROTAX® Compact Rotary Motor Axis

Welcome to the ASSEMBLY Show in Rosemont!

The new ROTAX® rotary motor axis completes compact, fast and precise assembly and handling task in a new dimension. ROTAX® is an electric servomotor axis with a hollow shaft feedthrough for vacuum or compressed air. It can be equipped with standard gripping tools which enable a 360° rotation. Thanks to the sophisticated bearing of the rotary shaft, the axis is able to withstand high forces in the axial direction. With the unique Forceteq® technology integrated into the XENAX® Xvi servo controllers, force-controlled processes are possible such as placing, joining and pressing .

Curious? You can find more information on our new [ROTAX® product brochure](#).

Or simply convince yourself and visit us in our booth at the ASSEMBLY Show! We are looking forward to meeting you!
