The new miniature hollow shaft servo motor ROTAX® Rxhq (High Torque) impresses with its extremely compact design, extra large hollow shaft and enormous torque. Direct drive motor, precise bearings and the single turn absolute encoder are completely integrated.

The self-developed direct drive servo motor is based on the... [read more here](#). On top you can also download the [STEP files and the data sheet](#) from our website.

Curious? We will be happy to show you the new possibilities personally at your premises. We look forward to hearing from you.

Best regards  
Esther Zumstein
